The Paulsen Airway

FEATURES AND BENEFITS

MULTIDIMENSIONAL SUCTION PORT

Allows for blind suction techniques to be employed at any time

SIDE SUCTION PORTS

Are contiguous with the Multidimensional Suction Port adding suctioning reach laterally while minimizing suction tissue adherence

RAPID SUCTION EVACUATION PORT

Attaches quick and effortlessly to standard suction tubing to remove airway secretions at a moment's notice, while lateral channels remain open to allow gases to free flow, providing for adequate gas exchange

NASAL CANNULA GROOVE

Provides easy hook up for conventional nasal cannula oxygenation from all sides of the port

SPECIFICATIONS

- Material: Polyethylene
- · Not Made with Natural Rubber Latex
- · Not Made with DEHP
