

ETCO₂ Sampling Cannulas

Dual Nasal/Oral

MedSource ETCO₂ Sampling Cannulas allow for a breath-by-breath sampling of ETCO₂ while simultaneously delivering oxygen.

Sampling of ETCO₂ in exhaled respiratory gases allows for healthcare workers to assess adequacy of patient perfusion, ventilation and oxygenation in patients receiving critical care. These cannulas pair with Capnograph Sidestream Monitoring Systems and come in a variety of configurations to meet hospital, acute care and prehospital ETCO₂ monitoring needs.

SPECIFICATIONS

- Dip molded PVC nasal cannula and oral scoop
- Not made with natural rubber latex
- Pair with sidestream monitor (low flow 50ml/min)
- Reflective orange connector
- PVC material not made with DEHP
- 7' of kink resistant tubing

Item #	Description	UOM
MS-35601A	Adult Nasal/Oral Dual CO ₂ Sampling Cannula W/ O ₂ Delivery	200/CS, 25/BX
MS-35601P	Pediatric Nasal/Oral Dual CO ₂ Sampling Cannula W/ O ₂ Delivery	200/CS, 25/BX

ETCO₂ Sampling Cannulas

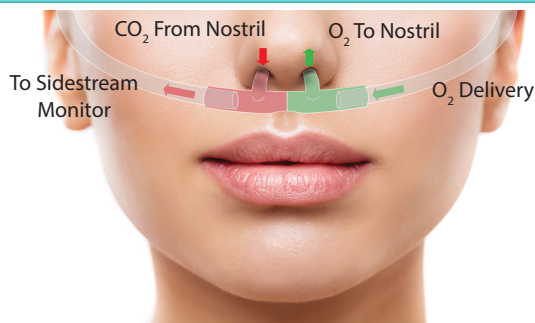

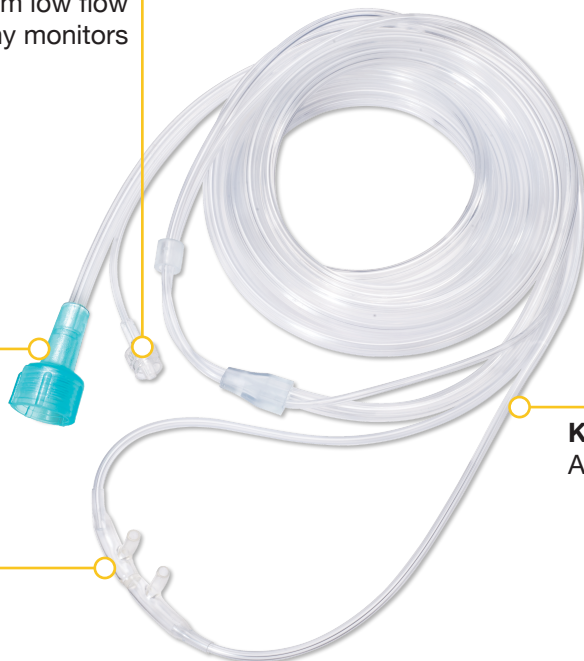

MedSource ETCO₂ Sampling Cannulas allow for a breath-by-breath sampling of ETCO₂ while simultaneously delivering oxygen.

Male Luer Connector
Pairs with sidestream low flow capnography monitors

Universal Connector
Compatible with all oxygen delivery systems

Soft Nares
Ultra soft PVC material for patient comfort

Kink Resistant Tubing
Available in 7', 10' and 14' lengths

Sampling of ETCO₂ in exhaled respiratory gases allows for healthcare workers to assess adequacy of patient perfusion, ventilation and oxygenation in patients receiving critical care. These cannulas pair with Capnograph Sidestream Monitoring Systems and come in a variety of configurations to meet hospital, acute care and prehospital ETCO₂ monitoring needs.

SPECIFICATION

- Dip molded PVC nasal cannula
- Male luer lock
- Not made with natural rubber latex
- PVC material not made with DEHP
- Kink resistant tubing
- Pair with any sidestream monitor (low flow 50ml/min)

MS-35400A10	Adult Nasal CO ₂ Sampling Cannula W/O ₂ delivery Luer Conn.10ft.	25 EA/BX, 150 EA/CS
MS-3400A14	Adult Nasal CO ₂ Sampling Cannula W/O ₂ delivery Luer Conn.14ft.	25 EA/BX, 100 EA/CS

ETCO₂ Sampling Cannulas T-Connector

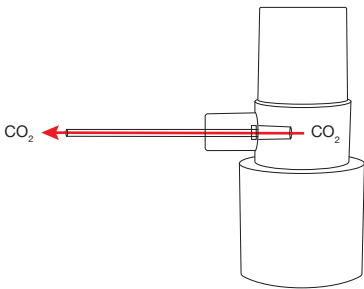

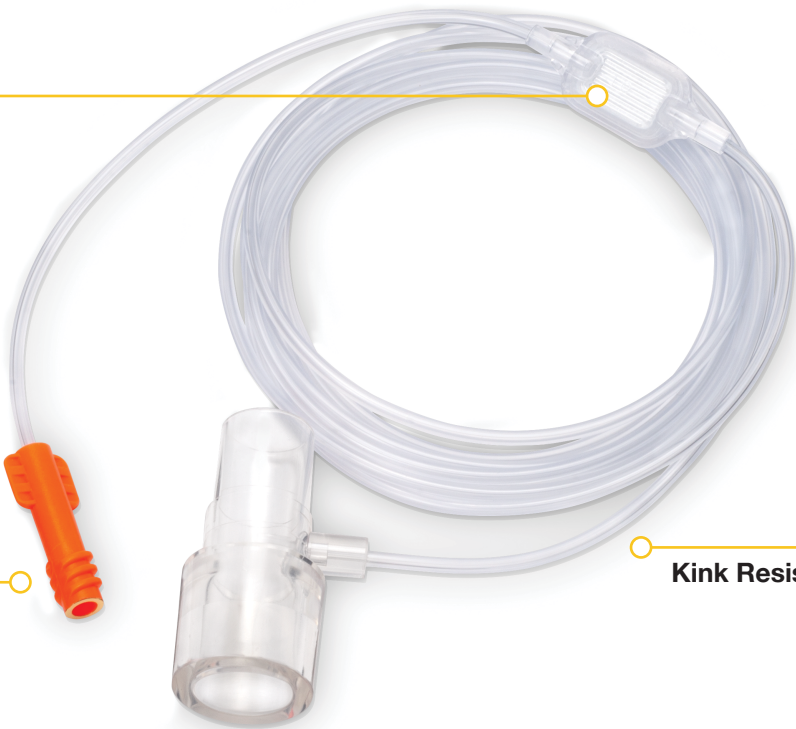

MedSource ETCO₂ Sampling Cannulas allow for a breath-by-breath sampling of ETCO₂.

Button Filter
Minimizes entrance of moisture from sampling ports to monitor

Reflective Orange Connector
Pairs with sidestream low flow capnography monitors
